Experienced in:

Clojure

Ruby

Java

Javascript

Python

Scala

Bash

Rails

PostgreSQL

Git

Hadoop

ImageMagick

Work Experience:

Dribbble - November 2010–August 2012

- Dribbble is an image sharing social network for graphic and web designers.
- Projects:
 - Colors Search: <http://dribbble.com/colors/>
 - Wrote a tool to search over 800,000 images by their colors
 - Invented, implemented, and optimized an algorithm to search by color.
 - Gave a presentation on it at the inaugural Boston Dribbble Meetup
 - Slides: <http://brucespang.com/colors%20presentation/slides.pdf>
 - Write API - Launching Eventually
 - Wrote an OAuth 2.0 implementation and lots of documentation
 - Did a variety of research projects on recommending content.
 - One that launched was: <http://dribbble.com/shots/suggestions>
 - Helping with scaling to approx. 20 million unique views per month.
 - Upgraded to Rails 3 - found and fixed bugs in Rails core.
 - Measured statistics related to site engagement.

Boston Web Studio - Summer 2010

- Designed and built a website for a lawn care company.

Hey, I Got You These! - Winter 2009–2010

- Website for webcomic authors and readers to view and post webcomics
- Built the portion of the site used by webcomic author (i.e. Comic uploading, etc...)

Projects:

Article Recommendation Thing - Early and Late 2012

- Wrote a tool to predict what articles someone should read based on what articles they like.
- It calculates similarity between the read articles of different users and recommends articles based on that.

Operating System - Fall 2012

- Built something that boots from GRUB to something written in C that has a clock and can print to the screen.

Food Recommendation Thing - Summer 2012

- Built a tool to find combinations of food in UMass's dining halls that satisfy published nutritional requirements.
- Worked on finding a efficient way to generate combinations of food that didn't involve searching through 2^n options.

Programming Languages - Winter 2011

- Implemented a subset of Scheme in Scala (<https://github.com/brucespang/schemer>)

Better jQuery Autocomplete (<https://github.com/brucespang/jQuery-Extensions>)

- Built something using a prefix trie which makes autocompleting much faster for large datasets.

Frank.php

- Sinatra in PHP

Events:

UMass ACM Hackathon - UMass Amherst - Fall 2012

- Wrote a mostly working, procedurally generated, pokemon-style roguelike
- Won 3rd place.

Hack/Reduce - Boston - Summer 2011

- Big Data hackathon
- Worked on a project to find similarities between twitter users
- Technologies:
 - Python+Hadoop
- Code: <https://github.com/gregsabo/TwitterRecommend>

Boston Startup Weekend

- Hey, I Got You These - Fall 2009
- StuffPass - Summer 2010

Node Knockout - SF - Summer 2010

- Built a multiplayer game

Relevant Education

High School

- AP Statistics
- Independent Study in CS

Completed Courses

- Multivariable Calculus
- Linear Algebra
- Data Structures
- Functional Programming Principles in Scala

Current Courses:

- Graduate Seminar on Programming Languages & Systems
- Probability in CS
- Intro to Systems
- Discrete Math

Honors

- National Merit Scholar
- Eagle Scout
